5 The present invention relates to an apparatus for modifying and feeding a liquid nutritional feeding composition. Said apparatus comprises 1) chamber (5) for receiving a beneficial agent for modifying a liquid nutritional feeding composition, the chamber having an inlet (7) connectable to a container (5) containing the nutritional feeding composition and an outlet (13) 10 connectable to a feeding means (8,9) and a pumping means associated (3) with the chamber for pumping said nutritional feeding composition from the container into the chamber and back to the container for mixing the beneficial agent into the nutritional feeding composition 15 before connecting the outlet (13) of said chamber to the feeding means (8,9). It is preferred that the chamber (3) comprises at least one flexible wall capable of being squeezed and released for pumping of the nutritional feeding composition. The invention also relates to a 20 method for modifying and feeding a liquid nutritional feeding composition.
